

VICTOR ADESHINA

SOFTWARE ENGINEER

I am a Full-Stack Software Developer and Assistant Technical Lead at Lotus Beta Analytics, where I lead the design and delivery of scalable, enterprise-grade web and mobile applications within a 20-engineer team.

I specialize in architecting reliable backend systems and high-performance frontends using Typescript, React, SharePoint Framework (SPFx), Node.js, Golang and Postgres/MongoDB, with a strong focus on scalability, maintainability, and clean architecture.

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE
National Open University Of Nigeria | 2023-2026

EXPERIENCE

FULL TIME SOFTWARE ENGINEER

Lotus Beta Analytics | 2025 - Current

- Developed cross-platform mobile applications using React Native, delivering core features aligned with business workflows and ensuring a consistent user experience across devices.
- Built and optimized high-performance web applications using React and Next.js, reducing page load time by ~1-1.5 seconds through code-splitting, lazy loading, and asset optimization.
- Led development of enterprise solutions using SharePoint Framework (SPFx), improving internal workflows and increasing team productivity by 80%.
- Designed and implemented reusable component systems across mobile and web platforms, reducing development time by 30%+.
- Integrated SharePoint services and REST APIs to deliver secure, data-driven features supporting business operations.
- Improved UI/UX and system efficiency, increasing user engagement and task completion rates by 10%+ across platforms.
- Collaborated with cross-functional teams to deliver production-ready solutions aligned with business goals.

SOFTWARE ENG. INTERN

Lotus Beta Analytics | 2025 - 2026

- Contributed to building enterprise applications using SharePoint Framework (SPFx) and React, improving UI consistency across internal platforms.
- Optimized application performance, reducing initial load time by ~20% through asset optimization and component refactoring.
- Developed reusable React components within SPFx solutions, improving development efficiency and reducing code duplication.
- Integrated REST APIs and SharePoint services to enable dynamic, data-driven features for business workflows.
